

GE Profile™ Opal™ 2.0 Nugget Ice Maker with Side Tank

Serve up crunchable nugget ice that's ready fast and retains its flavor with the GE Profile Opal 2.0 Nugget Ice Maker. This coveted countertop appliance makes the perfect craveable, chewable and cocktail-worthy nugget ice that's perfect for entertaining year-round.

The Opal Nugget Ice Maker was the first counter-top nugget ice maker for home use that didn't require any additional plumbing. It first launched in 2015 as a collaboration with GE Appliances and FirstBuild, the co-creation, maker space and microfactory owned by GE Appliances. Following a successful crowdfunding campaign that raised more than \$2 million, it quickly became a beloved product with a passionate fan base and eventually graduated to be mass-produced under the GE Profile brand.

Today, the GE Profile Opal 2.0 Nugget Ice Maker is the most award-winning countertop nugget ice maker*

Loaded with Premium, Innovative Features:

- **The Large Capacity Ice Maker** ensures that you never run out of nugget ice, making up to 1.6 pounds of fresh ice per hour and holding up to 3 pounds at a time.
- **Rapid Production** allows you to begin enjoying your first batch of ice in 10 minutes or less, with 1.6 pounds of ice produced per hour.
- **Convenient Cleaning Solutions** such as the advanced cleaning system helps sanitize (preventing mold and mildew growth) and descale (cutting down on scale and mineral build-up) when used regularly, keeping ice tasting fresh and machine performance at its best.
- **Innovative Design** allows for batch made ice which avoids clumping and leaks by recirculating ice melt to the water reservoir. You'll always have fresh ice on hand thanks to a smart, automatic ice maker that refills when your ice is running low.
- **An Intuitive LED Display Screen** illuminates when being used and darkens when at rest, allowing for precision control.
- **The Cutting-Edge Ice Filtration System** provides crisp and clean ice. The ice filtration system is available for the lower water reservoir and compatible with the filter P4INKFILTER.
- **The Side Tank** eliminates the need for an outside water source with an attached water supply for ice, which allows you to produce up to three times more ice and easily detaches for cleanup.
- **Built-in WiFi and Voice Control** technology allows you to monitor your device's status and schedule fresh ice. Plus, receive automatic software updates that include the latest ice maker features and access voice control capabilities through Alexa and Google.

*Compared to competitive countertop nugget ice makers. Awards include media endorsements and "Best of" lists. Award quantity based on awards received between 2021-2023
